Hardy Perennials

Rock Plants, Alpines, Aquatics,
Hardy Climbers, & Wall Shrubs.

With many Useful Hints on Culture.

A Border of Tall Flag Irises.

BARR & SONS,

11, 12 & 13 King Street, Covent Garden, London, W.C.2.

NURSERIES :—Bath Road, Taplow, Bucks.

No connection with any other Firm of the same name.

Special Notices and Terms of Business.

Carriage of Plants.—Our carriage terms in respect to Seed and Bulb Orders cannot be extended to Plant Orders, but in the case of prepaid orders amounting to **40s.** and over no charge will be made for packing. **The Railway Companies still require that the carriage on all passenger train traffic must be prepaid; we shall in such cases pay carriage and add the Railway charge to our invoice.**

Cash Discount 5 %.—A discount of **1s.** in the **£** (on orders over 40s. in value) may be deducted from all accounts for plants when paid within 14 days from the date of invoice. In the case of Prepaid Orders the discount may either be deducted when remitting, or if this is not done, a liberal equivalent in goods will be added to the Order.

Terms of Credit.—Our books are made up half-yearly, when all accounts are due net. Interest at the rate of 5 % per annum will be charged on overdue accounts.

Packages.—Boxes, etc., are charged at cost price, but may be deducted from our account if the empties and packing material are returned carriage paid within a fortnight. *Returned empties should have the sender's name on the address label for identification, and an advice sent to us by post, stating date of despatch and name of Railway.*

Remittances.—Money Orders and Postal Orders to be made payable at Bedford Street Post Office; these and all Cheques should be crossed "Westminster Bank, Ltd."

Catalogues.—Our **Seed Guide** is published 1st of January, **List of Bulbs and Tubers for Winter and Spring Planting** 1st of February, **Hardy Plant Catalogue** in February, **List of Autumn-flowering Bulbs** (Crocus species, Colchicums, etc.) in July, **Daffodil and General Bulb Catalogues** in August. We are always pleased to forward any of these Catalogues, free of charge, to friends of our Customers on receipt of a line requesting us to do so.

Gardeners.—We keep a special Register of Gardeners in want of situations, and shall be pleased to put such in communication with any of our Customers requiring Head Gardeners.

Notices to our Overseas Correspondents.

Prepayment necessary.—Owing to the expense incurred in collecting accounts abroad we beg that Customers will kindly enclose with their Orders a remittance, a draft, or an "order to pay" on a London Bank or Agent; the remittance should be sufficient to cover cost of postage or carriage when the freight is required to be paid in advance.

Cash Discount 5 %.—In the case of Prepaid Orders to value of 40s. and upwards we allow a discount of 1s. in the £ from the amount of **Bulbs, Seeds or Plants** ordered, which may either be deducted from remittance, or if this is not done, a liberal equivalent in goods will be added to the order.

Carriage.—No allowance for Carriage can be made in the case of Foreign Orders; the extra attention necessary precludes any kind of allowance in this respect.

Packing.—A moderate charge will be made where special materials have to be used, such as Sphagnum Moss, Oil-Silk, etc., and where any special packing necessitates a great deal of labour (as in the case of some Plant Orders), when out-of-pocket expenses only will be charged.

Parcel Post Rates.—AUSTRALIAN COMMONWEALTH, including TASMANIA and NORFOLK ISLAND (*P. & O. and Orient Lines direct*): 6d. per lb. (1s. 4d. for the first lb.).

NEW ZEALAND: Under 3 lb., 2s. 3d.; 7 lb., 4s.; 11 lb., 5s. 6d. Nearest port of entry should be stated.

UNION OF SOUTH AFRICA (CAPE, NATAL, ORANGE FREE STATE, TRANSVAAL), 9d. per lb.

INDIA (*P. & O. Line direct*): Under 3 lb., 2s.; 7 lb., 3s. 9d.; 11 lb., 5s. 3d.

JAPAN: Under 3 lb., 2s.; 7 lb., 2s. 9d.; 11 lb., 3s. 9d.

CHINA, British Agencies (including Shanghai): Under 3 lb., 2s. 3d.; 7 lb., 3s. 3d.; 11 lb., 4s. 3d.

EGYPT: 3 lb., 2s. 3d.; 7 lbs., 3s.; 11 lb., 3s. 9d.

KENYA AND UGANDA: Under 3 lb., 2s. 9d.; 7 lb., 4s. 6d.; 11 lb., 6s. 3d.

FRANCE: 2 lb., 1s. 6d.; 7 lb., 2s. 3d.; 11 lb., 2s. 9d.

CANADA: Under 3 lb., 2s. 3d.; 7 lb., 4s. 3d.; 11 lb., 6s. (Bulbs and plants can only be sent by Parcel Post to Canada by special permit obtainable by the importer from the Department of Agriculture, Ottawa, and mailing tags should be asked for when applying for import permit.)

UNITED STATES OF AMERICA: Under 3 lb., 2s.; 7 lb., 3s. 9d.; 11 lb., 5s. (Bulbs and Plants can only be sent by Parcel Post to United States by special permit obtainable by the importer from the Federal Horticultural Board at Washington, and mailing tags should be asked for when applying for import permit.)

Shipping, etc.—In **Shipping Bulbs and Plants** to Australia, New Zealand, America, India, and the Cape, we exercise great care in selecting, preparing, and properly packing the same. Still there are so many contingencies that we cannot, in any way, hold ourselves responsible for the condition in which Plants or Bulbs reach their destination. *Our Customers will confer a favour if they report, on arrival, the condition of the goods.* Our experience in *successfully preparing and shipping Seeds, Bulbs and Plants* to all parts of the world extends over a very long period.

BARR'S CATALOGUE OF Hardy Border Perennials, Alpines, Rock Plants, Aquatics, and Climbers.

1 " 25 " " "	24s.	3 " 25 " " "	70s.

CULTURE OF HARDY PERENNIALS AND ALPINES.

In preparing an Herbaceous Plant Border, dig deeply, and freely add well-decayed stable manure ; after digging or trenching, the ground should be allowed a few days to settle before planting. Plant only when the soil is in a friable condition ; it is better to temporarily lay plants in, or put them in damp sand, soil or peat fibre, if the ground is not in good working order, and wait, rather than plant in wet and clammy soil. After planting, the soil should be firmly pressed round the crowns of the plants ; this is most important, especially on freshly dug ground, where it may be necessary to repeat the operation two or three weeks after planting.

The crust or surface soil of all plant borders should be carefully and thoroughly broken in spring, and kept broken throughout the summer. This is one of the secrets of good cultivation, and if persevered in, much labour will be saved in watering, as the evaporation of moisture from the soil will thus be greatly reduced, while the ground is kept fertile, and fewer plants are lost during a long spell of dry weather. The free use of the hoe also effectively eradicates from the soil such pests as ground slugs, wire-worm, millipedes, etc. The best tool to use in choice borders and rock gardens is our New Pattern Hoe. (*For Cultivators and Hoes, see pages 96 and 97 of our Seed Catalogue for 1926.*)

Rhizomatous plants (such as *Iris*es, etc.) should, as a general rule, be planted with the rhizome near the surface.

Most spring and early summer flowering plants, such as *Pæonies*, *Eremuri*, and *Lenten Roses* (*Helleborus*), etc., should be planted where the morning sun does not reach them till after ten a.m., otherwise the flower buds or young growths may be injured by the early sun's rays falling on them while they are in a semi-frozen condition.

Rapid growing Hardy Perennial Plants—such as *Helianthus* (Sunflowers), *Asters* (Michaelmas Daisies), etc., should be transplanted every two years, replanting not more than two or three of the strongest single crowns to form a clump.

The flower spikes of most hardy herbaceous plants should be removed as soon after flowering as practicable, cutting the spikes off close to the ground ; this is especially advisable in the case of early-flowering plants, which will then often give a second crop of bloom the same season. It also keeps the plants strong and healthy, besides avoiding a harbour for slugs among the decaying flower-stems.

The question of SUN OR SHADE for plants is mainly dependent upon the amount of moisture a plant's roots can obtain from the soil. On rich and heavy land, or deeply dug and well manured soils, where sufficient root moisture exists, most plants will take all the sun they can get, whereas on shallow, thin, or badly dug soils, shade or partial shade is necessary to the successful growth of many plants owing to the rapid evaporation of moisture from the soil and the plant's leaves, and the consequent starvation or overtaxing of the roots. On poor, sandy, or shallow soils a heavy mulching of rotten manure, applied in autumn or early spring, will prove a valuable assistance to the growth of all hardy herbaceous plants, together with an occasional dressing of our *Phytobroma*, a carefully compounded artificial manure containing all the essentials for plant growth. Full particulars of our *Phytobroma*, with analysis and directions for use, sent on application.

So much do plants depend upon root-moisture that often a few small stones placed on the surface of the ground or partially buried near the roots of such plants as *Hepaticas*, *Cyclamen*, etc., to retard evaporation, will ensure their success where otherwise they would be a failure. Marsh, aquatic, and Alpine plants especially like full sunshine when they are able to obtain abundance of moisture at the roots, otherwise they are best grown in partial shade.

In gardens where there is little natural shade, this can generally be obtained by the use of tall-growing herbaceous plants or annuals, such as *Sunflowers*, clumps of *Sweet Peas*, etc.

In the following pages we have stated in a general sense the situations most suitable for the plants enumerated, also their general height and time of flowering.

Most tap-rooted plants are best planted in autumn. In cold districts all autumn plantings should be given some slight covering, such as cut heather, cut gorse, or very light litter ; cut fern or bracken is not recommended, as it lies too wet.

NOTES ON ROCK AND WALL GARDENS.

Situation.—The site selected for a Rock Garden should be one exposed to full sun, as most Alpines object to the shade and drip from trees.

Retaining Walls.—These can be made in most gardens to take the place of grass banks, and if built of stone, can be made the home of most Alpines, producing a wealth of bloom from early spring onwards.

The Moraine.—A part of every Rock Garden should be devoted to a **Moraine** (a pocket or natural gully between the rocks), filled to a depth of 18 inches to 2 feet as follows : first with 9 inches of a mixture consisting of three parts river pebbles and one part river grit ; on top of this, 6 to 9 inches of a mixture consisting of three parts fine granite chips or fine limestone chips, and one part of good sandy loam. In place of granite chips finely crushed crocks may be used, and broken-up bricks may be substituted for river grit ; we recommend, however, the first-named arrangement. The idea is to imitate the natural large pockets found on the Alpine slopes, which are so rich in the rarer Alpine flora.

The advantages derived from the **Moraine** are even moisture and perfect drainage, thus affording a thorough ripening of growth. In a carefully constructed **Moraine**, the amateur will find he can grow many choice Alpine plants he has previously failed with.

HARDY PLANTS for VARIOUS SITUATIONS, Etc.

In order to assist amateurs in making suitable selections for special purposes, we have carefully prepared the following lists of the most decorative and choicest plants of their kind adapted to different phases of outdoor gardening. For descriptions and prices see body of Catalogue.

† indicates those plants specially valuable for cutting.

* indicates those plants which will thrive in town gardens.

HARDY PERENNIALS FOR SUNNY FLOWER BORDERS.

†*Achillea.	†*Chrysanthemum, Hardy	†*Iris, Tall Flag.	†*Pinks.

<i>Cardamine.</i>	* <i>Gaultheria procumbens.</i>	<i>Mimulus.</i>	* <i>Tiarella cordifolia.</i>
* <i>Cerastium.</i>	<i>Gentiana lagodechiana.</i>	* <i>Myosotis.</i>	* <i>Trillium.</i>
<i>Chrysogonum virginicum.</i>	" <i>verna.</i>	* <i>Polygonum vacinifolium.</i>	* <i>Viola.</i>
<i>Cornus canadensis.</i>	* <i>Hepatica.</i>		

CHOICE HARDY ROCK GARDEN BULBOUS SUBJECTS.

No Rock Garden is complete without the inclusion of little Alpine bulbous subjects such as those enumerated below. These will be found offered and fully described in our Autumn Bulb Lists (free upon application). We can strongly recommend these little Spring gems for outlining the rocks and stones.

<i>Anemone apennina</i> vars.	<i>Erythronium</i> , in var.	<i>Muscari</i> , in variety.	<i>Narcissus juncifolius.</i>
" <i>blanda</i> vars.	<i>Fritillaria</i> , in var.	<i>Narcissus Bulbocodium</i> vars.	<i>Oxalis floribunda.</i>
" <i>nemorosa</i> vars.	<i>Galanthus</i> , in var.	" <i>cyclamineus.</i>	<i>Scillas</i> (dwarf species).
<i>Calochortus</i> , dwarf vars.	<i>Hyacinthus amethystinus.</i>	" <i>Triandrus</i> vars.	<i>Tulip persica.</i>
<i>Chionodoxa</i> , in var.	<i>Iris</i> (dwarf bulbous species).	" <i>minimus.</i>	" <i>Clusiana.</i>
<i>Crocus</i> species.	<i>Milla uniflora.</i>	" <i>nanus.</i>	" <i>other dwarf species.</i>
<i>Cyclamen</i> (hardy species).			

New and Noteworthy Hardy Plants.

Note.—F.C.C. R.H.S. = First-Class Certificate, Royal Horticultural Society.

„ St. Anthony , cup-shaped flowers, bright cerise-rose, with large bunch of twisted rose-coloured stamens edged yellow, <i>extra fine</i>	4 6
„ St. Hilda , large pure white flowers with cut petals, striped crimson, and having a large bunch of golden stamens.....	3 6
PINK Etoile de France, flowers bright rich red, very showy, a valuable acquisition to our hardy garden Pinks.....	1 6
PRIMROSE Old Irish Green Variety, a very rare and old-fashioned primrose, producing flowers of a charming shade of green.....	5 6
POLYANTHUS-PRIMROSE , New Spetchley Strain, a lovely new giant-flowered strain raised by the late Mrs. Berkeley, of Spetchley Park, Worcester. The plants are of strong robust growth and the flowers mostly very large, ranging through a great variety of beautiful colours and art shades; when established they flower continuously throughout the year.....per 100, 42/-; per doz. 5/6	0 6
PRIMULA pulverulenta Mrs. Berkeley, a very pretty variety of <i>P. pulverulenta</i> , having delicate blush-coloured flowers with orange eye, 2 to 3 ft.	1 6
„ Red Hugh , a lovely new garden hybrid, producing in whorls on stout stems large fiery madder-red flowers, 1 ft.; a good hardy perennial; A.M. R.H.S.	1 6
ROMNEYA trichocalyx (Californian Poppy), producing large snowy white fragrant flowers 6 to 7 in. in diameter with a central bunch of golden stamens, foliage of a beautiful blue-grey, <i>Aug.-Oct.</i> , 5 ft.; much freer blooming and altogether a finer plant than the old <i>R. Coulteri</i>	2 6
SALVIA azurea grandiflora, producing in late summer long racemes of clear blue flowers; a good plant for hot dry sunny situations, 4 ft.	1 6
„ Grahami , a Mexican species, producing rich ruby-purple flowers in late summer, 4 ft.; suitable for warm sunny situations.....	1 6
SHORTIA galacifolia, a choice and beautiful plant from North Carolina, producing in spring sprays of dainty white flowers flushed pink, foliage evergreen richly coloured in Autumn and Winter; suitable for moist situations on rockwork, etc., 6 in.	2 6
TRADESCANTIA virginica Taplow Crimson (new), producing bright double rich crimson flowers of very graceful habit, 18 in., <i>extra fine</i>	2 6
TROLLIUS Empire Day, bearing large clear yellow globe-shaped flowers, with brilliant orange-scarlet stamens, <i>May-June</i> , 2½ ft.; a great beauty.....	2 6
VERBASCUM Cotswold Queen, a fine new perennial Mullein, producing branched spikes of flowers of a beautiful crushed strawberry colour; it generally gives a second crop of bloom in late summer, 4½ to 5 ft., very distinct.....	2 6
VIOLA gracilis Huntercombe Purple, producing handsome rich clear purple flowers; a splendid bedding variety, and continuous bloomer.....per doz. 7/6	0 8
WAHLENBERGIA serpyllifolia major (The Large-flowered Thyme-leaved Harebell), producing in profusion large rich violet-blue bell-shaped flowers, <i>May-June</i> , 3 in.; an excellent rock plant of prostrate growth.....per doz. 16/-	1 6

BARR'S

HARDY BORDER PERENNIALS,

Alpines and Rock Plants.

Alphabetically arranged for easy reference.

The Hardy Border Perennials, Alpines, and Rock Plants offered in the following List have been selected as being the very best and most decorative varieties; those of lesser decorative value or of doubtful hardiness we have eliminated.

For Hardy Ornamental Grasses, Reeds, etc., see page 66.

For Hardy Aquatics and Moisture-loving Plants, see page 66.

For Hardy Climbers and Wall Shrubs, see page 69.

For Collections of Hardy Perennials, etc., see page 1.

Note.—F.C.C. R.H.S. = First-Class Certificate, Royal Horticultural Society.

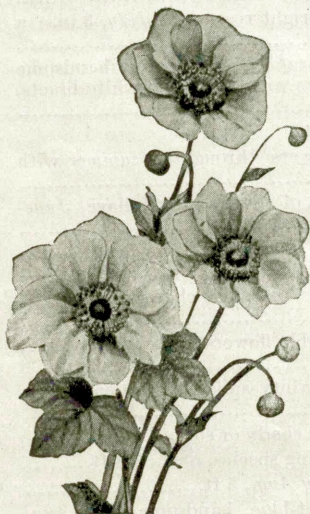

A.M. R.H.S. = Award of Merit, Royal Horticultural Society.

H.C. R.H.S. = Highly Commended, Royal Horticultural Society.

SPECIMEN CLUMPS (or Plants of Extra Large Size) can in many cases be supplied at higher prices. These Specimen Clumps (or extra large Plants) will only be sent when specially ordered.

	each—s. d.
ABUTILON vitifolium, for description see page 5.....	4 6
ACÆNA (<i>New Zealand Bur</i>), creeping prostrate evergreen rock plants, with delicately tinted small foliage, valuable for clothing bare ground beneath trees, and for crevices of stone paving, steps, etc.	
„ Buchananii, producing a beautiful glaucous-green carpet of foliage, 2 in.....	0 9
„ inermis, foliage of a beautiful persistent bronzy hue, 2 in.....	0 9
„ microphylla, small bronze foliage covered in summer and autumn with spiny crimson balls, 1 in.	0 9

„ ageratifolia, producing snow-white daisy-like flowers throughout summer with silvery grey foliage, $\frac{1}{2}$ ft.....	0 9
„ argentea (<i>Snowy Alpine Yarrow</i>), pretty rosettes of silvery grey foliage, <i>June-July</i> , 4 in. A charming rock plant.....	0 9
„ filipendulina (syn. <i>Eupatorium</i>), bearing handsome flat golden flower-heads, <i>July-Aug.</i> , 5 ft. A fine border plant.....	per doz. 8/- 0 9
„ Millefolium Cerise Queen, producing flat heads of bright cherry-red flowers, <i>June-July</i> , 3 ft. A fine border plant.....	1 0
„ Ptarmica fl. pl. The Pearl, pure white fully double flowers, prized for cutting, a showy border plant, <i>July-Aug.</i> , 2 ft.....	per doz. 5/6 0 6
„ tomentosa, producing from a dense green carpet dainty spikes of golden flower-heads ; fine rock plant, <i>June-July</i> , 4 in.	0 9
ACONITUM (<i>Monkshood</i>), effective in flower borders either in shady or sunny aspect.	
„ Fischeri, flowers clear blue, a lovely autumn-flowering species, <i>Sept.</i> , 3-4 ft.....	0 9
„ Napellus bicolor, blue and white, very showy <i>July-Aug.</i> , 5 ft.....	0 9
„ „ Sparks' Variety, flowers glistening violet-blue, handsome, <i>July-Aug.</i> , 5 ft.	0 9
„ volubile (<i>Climbing Monkshood</i>), of twining habit, flowers clear blue, <i>Sept.</i> , 8 ft.....	1 0
„ Wilsonii, light blue, showy, <i>Sept.</i> , 5 $\frac{1}{2}$ ft.....	1 0
ADONIS (<i>Flower of the Gods</i>), showy golden-yellow flowers arising from a tuft of graceful soft green foliage during early spring ; excellent for sunny or semi-shady situations.	
„ amurensis, producing large single golden flowers, $\frac{3}{4}$ ft.....	1 0
„ „ Nadokaki, showy golden-yellow double flowers with a bright green central rosette, 6 in.....	1 0
„ vernalis, bearing golden star-shaped flowers, 6 in.	0 9

		each—s. d.
ÆTHIONEMA pulchellum (<i>Persian Candytuft</i>), flowers soft pink, 6 in.; a charming rock plant.....		1 6
„ amœnum Warley Hybrid , <i>see New and Noteworthy Plants, page 5.</i>		1 0
AGAPANTHUS (<i>African Lily</i>). <i>See Spring Bulb Catalogue.</i>		
AJUGA (<i>Bugle Flower</i>) reptans atro-purpurea , a handsome permanent carpeting plant bearing brilliant blue flowers and rich purple-bronze foliage, <i>June-July</i> , 9 in.....		0 6
ALYSSUM (<i>Rock Madwort</i>), producing sheets of flowers; for sunny positions, borders, rock-work, walls, etc.		
„ saxatile citrinum , masses of self lemon-yellow flowers, beautiful, <i>May-June</i> , $\frac{1}{2}$ ft., F.C.C. R.H.S.....		0 9
„ „ compactum (<i>Gold Dust</i>), sheets of golden flowers, <i>May-June</i> , $\frac{3}{4}$ ft. per doz. 5/6		0 6
„ „ fl. pl. , producing a mass of miniature double golden flowers, <i>May-June</i> , most effective, $\frac{1}{2}$ ft.....per doz. 8/-		0 9
„ spinosum , dainty white flowers, and persistent tufted grey foliage; a good rock and wall plant, <i>June-Aug.</i> , 5 in.....		1 0
ANCHUSA (<i>Alkanet</i>). The following rank among our best blue summer-flowering border plants; they are also excellent Bee plants.		
„ italica Dropmore , <i>Gentian-blue, June-Aug., A.M. R.H.S.</i> , 5 ft.....		0 9
„ „ Opal , flowers pale blue, <i>June-Aug.</i> , beautiful, 5 ft.....		0 9
„ „ Pride of Dover , lovely pale clear blue flowers of good size, produced in large pyramidal heads, <i>June-Aug.</i> , 5 ft.....		0 9
„ myosotidiflora , producing sprays of dainty blue flowers, resembling “Forget-me-nots,” <i>April-June</i> , $1\frac{1}{2}$ ft.; it should be given semi-shade.....		0 9
ANDROSACE (<i>Rock Jasmine</i>), beautiful High Alpines, thriving in rock fissures, sunny crevices, or amongst stones.		
„ Laggeri (syn. <i>carnea</i>), producing dainty green cushions studded with miniature pink flowers, a rare Alpine, <i>May</i> , 2 in.....		1 6
„ lanuginosa , a lovely Himalayan Alpine of trailing habit, bearing in summer heads of dainty pink flowers with yellow centre, and having beautiful silvery grey silken foliage, <i>June-Aug.</i> , 4 in.....		1 0
„ sarmentosa Chumbyi , very lovely and choice Alpine, of easy culture, forming dainty rosettes of rose-pink flowers, <i>May</i> , 4 in.....		1 0
„ Vitaliana . <i>See Douglasia, page 22.</i>		

ANEMONE JAPONICA QUEEN CHARLOTTE.

ANEMONE JAPONICA (*Japanese Anemones*).

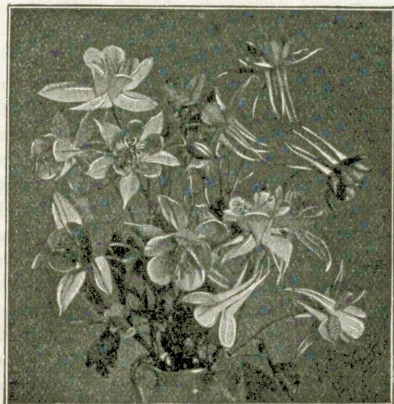

Few plants are more beautiful from *August* to *October*, with their large open saucer-shaped flowers ranging from pure white to full rose. All are prized for cutting. They thrive in any ordinary flower border either in full sun or partial shade, and when massed produce a most charming picture.

BARR'S PERENNIAL ASTERS.

Michaelmas Daisies or Starworts.

Gold Medal awarded to us by the Royal Botanic Society.

ASTER NOVI-BELGII GLORY OF COLWALL.

As a pot plant the Michaelmas Daisy rivals the Chrysanthemum for autumn decoration. To obtain the best results, pot up strong single crowns in March or April, and grow on in the same manner as the Chrysanthemum.

Michaelmas Daisies fill a most important place in all hardy flower gardens, lighting up the borders and shrubberies with masses of brightly-coloured blossoms throughout the autumn months up to November, when other flowers are scarce. To cut for vases and church decoration, etc., they are invaluable, providing an inexhaustible supply of bloom. They are also excellent for naturalising in meadows, shrubberies, hedgerows, etc., where the most beautiful effects are easily obtainable by their use ; they thrive equally well in partial shade or in full sun. Long borders, drives, shrubby walks, etc., should be planted liberally with breadths of Michaelmas Daisies to obtain fine colour effects during autumn. The graceful small-foliaged varieties of *cordifolius*, *ericoides*, *Tradescantii*, etc., are of great value where light, cloudy effects are required in the border. The dwarfier and more slender-growing kinds deserve prominent positions in the choice border and rock garden.

The Michaelmas Daisy is of the easiest culture, thriving in all soils and situations, and being uninjured by the most severe weather. Plant in spring or autumn.

Barr's Selections of Beautiful Michaelmas Daisies.

ASTERS (MICHAELMAS DAISIES)—*continued.*

each—s. d.

acris, bright lavender-blue, a handsome and showy border plant, *Aug.-Sept.*, 2 ft..... 0 9

Amellus, These are amongst the largest flowered of **Michaelmas Daisies**, the individual blooms measuring from 2 to 3 inches across. They are of erect bushy habit seldom exceeding 2 ft. in height, and rank amongst our most handsome and decorative border plants: they are invaluable for massing for autumn colour effects, while for cutting they are greatly prized.

6 in 6 named *Amellus* varieties.....4/6

" *Beauty of Ronsdorf*, beautiful mauve-coloured flowers, measuring 2½ inches in diameter, with golden disc, *Sept.-Oct.*, 2 ft., **A.M. R.H.S. 1920**..... 1 0

" *Beauté Parfait*, violet-purple, *Aug.-Sept.*, 2 ft., **H.C. R.H.S. 1920**..... 0 9

" *cassubicus*, large deep violet-blue flowers, *Sept.*, 2 ft., **A.M. R.H.S. 1920**..... 0 9

" *Framfieldii*, large violet-blue flowers, golden disc, handsome, *Oct.*, 2 ft....per doz. 7/- 0 8

" *King George*, immense flowers measuring 3 inches in diameter, with broad florets, rich violet-blue with golden disc; this is the largest flowered of all **Michaelmas Daisies**, and produces blooms of perfect quality, *Sept.*, 2½ ft., **FIRST-CLASS CERTIFICATE R.H.S. 1920**..... 1 6

" *Mrs. Perry*, rich deep violet-purple, quite distinct, 2 ft., *Sept.*, **A.M. R.H.S.**..... 1 6

" *Perry's Favourite*, soft pink with golden centre, *Sept.-Oct.*, 2½ ft., **A.M. R.H.S.**... 0 9

" *Preziosa*, rich violet-blue, fine for massing, *Sept.*, 2 ft., *one of the best*.....per doz. 7/- 0 8

" *rubellus*, bright rosy mauve, very showy, *Sept.-Oct.*, 2 ft., **A.M. R.H.S. 1920**..... 1 0

" *superbus*, clear violet-blue, large flowers of perfect form *Sept.-Oct.*, 2 ft., **A.M. R.H.S. 1925**..... 1 6

cordifolius *Ideal*, producing long graceful sprays of small pale lavender flowers from the ground upwards, *extra fine*, *Oct.*, 5 ft., **H.C. R.H.S. 1920**.....per doz. 8/- 0 9

diffusus horizontalis, small white flowers with large crimson centre, borne on crimson stems, with heath-like foliage, of prostrate and spreading growth, *Oct.*, 2 ft..... 0 9

ericoides. The varieties in this section have fresh green heath-like foliage, and produce small dainty flowers borne on long graceful arching sprays, the plants being covered in blossom from the ground upwards. For cutting they are invaluable.

" *Amy*, pretty small silvery mauve flowers produced in light graceful sprays on crimson stems, *Oct.*, 3 ft., **H.C. R.H.S. 1920**..... 0 9

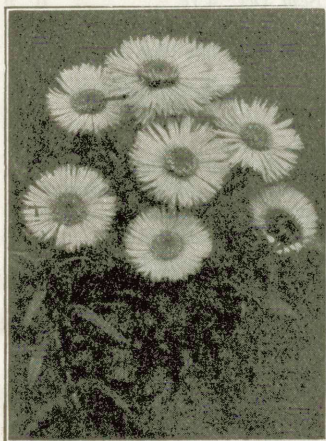

" *Blue Star*, producing long sprays of dainty, small, light blue flowers, with crimson centre, and of charming bushy habit, *Oct.*, 2½ ft., **H.C. R.H.S. 1920**..... 0 9

" *Chastity*, small dainty white flowers with golden centre, produced in arching sprays, *Sept.-Oct.*, 4 ft., **H.C. R.H.S. 1920**..... 0 9

" *Silver Gem*, sprays of small silvery blush flowers, valued for cutting, *Sept.-Oct.*, 4 ft..... 1 0

Esther, forming a bush of soft green heath-like foliage, covered with dainty pink and blush flowers, borne on crimson stems, a charming plant, *Oct.*, 2 ft..... 1 0

gracillimus, flowers white, changing to delicate rose-pink; graceful dainty habit of growth, *Oct.*, 4 ft..... 0 9

ASTER NOVÆ-ANGLIÆ BARR'S PINK.

Linosityris (*Goldilocks*), dense terminal clusters of small round heads of bright golden-yellow flowers with very fine thin feathery foliage, pretty and distinct, *Aug.-Sept.*, 2 ft..... 0 9

novæ-angliæ, producing large handsome flowers in terminal clusters.

" " *Barr's Pink*, large open bright rose-pink semi-double flowers, with showy gold and bronze central disc. Excellent as a cut flower, lasting well in water and equally charming in artificial light as in daylight. The plant is of elegant and graceful habit, **THE FINEST PINK MICHAELMAS DAISY YET RAISED**, *Sept.*, 4½ ft. Award of Merit at the R.H.S. Wisley Trials, 1925.....per doz. 36/- 3 6

" " *Lil Fardell*, rich clear rose-pink flowers with golden centre, *Sept.-Oct.*, 5½ ft., **A.M. R.H.S. 1920**.....per doz. 5/6 0 6

" " *Mrs. J. F. Rayner*, bright rosy red flowers, *Sept.-Oct.*, 5 ft., **A.M. R.H.S.**..... 0 9

novæ-angliæ *Mrs. S. T. Wright*, large well-formed handsome flowers, bright rosy mauve with golden-bronze disc, *Sept.-Oct.*, 3 ft., **A.M. R.H.S. 1920**...per doz. 8/- 0 9

" " *Stormcloud* (*new*), large purple flowers with handsome old-gold centre and deep purple buds, very striking, *Oct.*, 5 ft.....per doz. 10/6 1 0

" " *Thorpe Hall*, rich clear purple with golden-bronze centre, large open flowers, very handsome, a fine border plant, *Oct.*, 5½ ft.....per doz. 8/- 0 9

ASTERS (MICHAELMAS DAISIES)—*continued.*

each—s. d.

novi-belgii.	The varieties in this section are mostly large-flowered, and produced in great profusion; all are strong free growers.

DELPHINIUM (*Perennial Larkspurs*). These handsome stately border plants produce during *June* and *July*, long bold flower spikes ranging in colour from the palest sky-blue to the darkest shades of indigo and violet, and are unrivalled for producing blue effects in the summer border. If after the first flowering the stems are cut down close to the ground to induce fresh growth, they will bloom again in the autumn.

TALL BEARDED FLAG IRISES

Pogoniris, or *Iris Barbata* (*Fleur de Lys*).

For Flower Borders, Shrubberies, and for Naturalising.

Most of the Irises in this section are delicately fragrant.

At the great Iris Conference in June, 1922, we were awarded the R.H.S. Gold Medal for our unique collection, and at the special Iris trial of the R.H.S. at Wisley, 1916, our collection was the most prominent and received the greatest number of awards and marks of commendation. The Awards are indicated in the descriptions given below, thus :—F.C.C. = First Class Certificate. A.M. = Award of Merit. xxx. = Highly Commended. xx. = Commended.

TALL BEARDED FLAG IRISES.

terrace walks, on the top of lean-to walls, or grouped along the banks of rivers or streams, these Irises produce a glorious effect.

Where space permits, we strongly recommend flower lovers to make an “*Iris Garden*,” planting in bold groups or waves of irregular outline, with grass or flagstone walks running between. A selection should be made including the Dwarf Hybrid Crimean Irises, which bloom from *March to May*, and are therefore valuable in giving a succession of bloom, and being all of dwarfer growth are suitable for

Flag Irises have always formed an important part of our cultures since as far back as 1870, when our collection was acknowledged to be the most complete in England. Compared with the present time there were then very few growers of Irises besides ourselves, and our annual exhibits of these beautiful flowers were always greatly admired.

Within recent years a great number of new seedling varieties have been raised, some of them improvements, others not. In the following list we have included some of the best of those which are not too exorbitant in price. The more expensive ones, where of real merit, will appear in our catalogue when the prices become more reasonable.

The Iris, with its varied and beautiful shades of colour and long period of flowering, lends itself to a great variety of grouping. No hardy herbaceous border is complete without groups of Irises of different shades of colour planted at intervals throughout the border, as they impart tone and colour from May to July, while their soft glaucous foliage helps to bring into relief the colours of other flowers.

A border planted entirely with Tall Bearded Irises (see Front Cover), tastefully grouped, presents a picture of artistic beauty which must appeal to all. Massed as fringes to

IRIS, TALL BEARDED FLAG—*continued.*

planting in front of the taller growing varieties. The Beardless species should also be included, as they mostly flower after the Tall Flag Irises, and many of them being much taller are valuable subjects for the back of Flower Borders. As the Iris shows but little foliage in spring, early-flowering bulbous subjects should be introduced, such as **Snowdrops, Crocuses, Chionodoxas, Muscari, Winter Aconites and Daffodils**, etc. Thus a delightful succession of flowers can be maintained from early spring to July.

We have arranged these **Tall Bearded Irises** in natural groups in accordance with **Baker's Iriseæ**, as recognised by **Kew**, and this will be found helpful to amateurs in making selections. Each group has a distinctive character. **Group I.** comprises those varieties flowering in *May*, and includes the well-known blue, purple, and white *Flag Irises* one sees so often in town and suburban gardens and parks, besides a number of handsome *May-flowering* garden forms of recent introduction; following in *June* come the *Irises* of **Group II.**, comprising the varieties of *Amœna*, *Neglecta*, *Pallida*, *Plicata*, *Squalens*, and *Variegata*, with their beautiful and distinctive colours and markings. **Group III.** comprises the *Dwarf Crimean Hybrids*, flowering from *March* to *May*, suitable for the *Rock Garden* etc.; **Group IV.**, represents the *Beardless Species* for borders and water-side; **Group V.**, *Iris Kämpferi*, the *Clematis-like Japanese Iris*.

CULTURE.—Iris like a well-drained soil and moderately sunny situation. It is important that the soil should not be deficient in lime, and when preparing the ground a good dressing of lime is recommended. They object to fresh stable manure, which must be avoided when planting. An occasional application in early spring of superphosphate of lime, using about 2 ounces to the square yard, will add vigour to the plants and correct any acidity in the soil. *Plant shallow, barely covering the rhizomes or root stocks with soil.*

Flag Irises may be planted any time from late *July* to end of *March*, whenever the ground may be in the most suitable condition. Late summer and early autumn planting will ensure better bloom the first season.

GROUP III. Dwarf Bearded Hybrid Crimean Irises.

DWARF IRIS APHYLLA DITTON PURPLE,
IN THE ROCK GARDEN.

These beautiful Irises flower from March to May (before the Tall Flag Irises) and are therefore specially valuable in maintaining a succession of bloom from early spring. Being of dwarf growth they are suitable for planting in front of the taller growing Flag Irises. They are also valuable as permanent edgings to Flower Borders and are charming subjects in the Rock Garden and for old walls. The time of flowering is indicated by numbers after the name, thus (1) is the earliest, and (6) the latest to bloom.

Barrs' Selections of Dwarf Crimean Flag Irises.

Flowering during March, April, and May.

GROUP IV. Irises—Beautiful Beardless Species.

Including Varieties suitable for Borders, Ponds, Damp Places and Rockwork, but all Sun-lovers.

The Irises offered in this Section are all perfectly hardy, and quite distinct from the *Bearded Irises*. Those marked thus §, while being beautiful **border plants**, may also be treated as **semi-aquatics**. **I. cristata** has lovely amethyst-blue flowers, and is charming on rockwork in sunny but damp situations. **I. unguicularis (stylosa)** and its varieties, if grown in a sunny and well-drained position, will yield abundance of charming flowers throughout winter.

Barr's Selections.

12 in 12 named Beardless species and varieties for Flower Borders.....	9/- & 12/-
12 „ 12 „ „ species and varieties for Waterside.....	10/6 & 15/-
100 „ 10 „ „ varieties for planting round Ponds, Lakes, Streams, etc., 65/-	

† Denotes the most suitable for planting at the waterside or in very damp or wet places.

§ Denotes those Irises which, besides being handsome subjects for the flower and shrubby border, may also be planted by the waterside, but with their crowns above the water level.

PÆONIES.—BARR'S HARDY DOUBLE CHINESE.

June and July-flowering. Sweet-scented.

DOUBLE CHINESE PÆONY EUGENE VERDIER.

during spring, plant in a S.W. or W. aspect, so that the sun's rays do not fall upon them before 11 or 12 o'clock, or the flower buds may be damaged by the early morning sun falling on them when they are in a half-frozen state. This can be obviated by selecting the positions named above.

THE PLANTING season for Pæonies is from *September to April*; those planted in *early autumn* will bloom the following summer.

New Japanese Anemone Flowered Pæonies, see New and Noteworthy Plants, page 8.

BARR'S HARDY SINGLE CHINESE PÆONIES.Varieties of *Pæonia albiflora*.—June-flowering.

SINGLE CHINESE PÆONY.

These **Single Chinese Pæonies** are much prized for cutting, having flowers of great beauty, ranging in colour from *snowy white*, through all shades of *blush*, *pink*, and *rose* to the *deepest* and *richest crimsons*. They bloom in June, and are exceedingly decorative plants for herbaceous borders and to intermingle with shrubs, etc.; for half-shaded woodland walks they will be much prized.

CULTURE.—Any ordinary garden soil enriched with manure.

Victoria , brilliant deep crimson, very handsome.....	1	6
Vulcan , carmine-rose flowers.....	1	6

HARDY Double European May-flowering PÆONIES.Varieties of *Pæonia officinalis*.

These Pæonies are very old inhabitants of our gardens, and at the present day, like many other **Old-fashioned Flowers**, are being very generally appreciated, and well they may, as few plants are so elegant in outline, so free-flowering and decorative as the **Old Double Crimson**, **Rose**, and **Flesh-White Pæonies**. In **partially shady groves** and north borders these European Pæonies thrive and are happy; while in beds or as single specimens they are exceedingly effective.

CULTURE.—Any ordinary garden soil enriched with manure.

	each—s.	d.
Old Double Crimson , large handsome rich blood-crimson flowers.....per doz.	16/-	1 6
Old Double Rose , flowers full rose, passing off flesh colour.....	16/-	1 6

officinalis La Negresse (new) , very large deep maroon-crimson flowers, almost black, <i>very handsome</i> , 2 ft.....	5	6
“ sanguinea plena , semi-double flowers, broad guard petals, centre filled with finely cut petals, crimson shading to scarlet, <i>extra fine</i>	4	6

MAY-FLOWERING SINGLE PÆONIES.

Hardy European Species and Varieties.

These elegant plants bear flowers of great beauty, and are highly appreciated in herbaceous borders, beds on lawns, in shrubberies, as a background in rock gardens (see rockwork at Kew Gardens), and for naturalisation. With the exception of *Anomala* and *Lutea*, they are of European origin.

The **Single European Pæonies** possess considerable character and diversity in foliage and habit of growth; some are tall with a fine bold outline, others dwarf and bushy; some have very large Poppy-like flowers, while others produce blooms not unlike Water Lilies. A more interesting and showy class of plants for flower border decoration it would be difficult to find. Their value is still further

PÆONIES, May-flowering Single European—continued.

enhanced by their thriving under large trees, thus supplying the necessary floral display often wanting in shady walks ; they also establish themselves rapidly in grass and make capital subjects for naturalising or to use as an undergrowth (rabbits, etc., will not touch the foliage).

The **Single Pæonies** offered in the following list bloom from early in *May* until the first or second week in *June*, at which period the **Single Chinese Pæonies** commence to open ; these latter are offered on page 47.

CULTURE.—Any ordinary garden soil enriched with manure ; they thrive equally well in full sun or partial shade.

6 in 6 beautiful named varieties (our own selection) 8/6		each—s.	d.

Mixed European Single Species , valuable plants for massing in woodlands, wild gardens, etc.....	per doz. 16/-	1	6

HARDY TREE PÆONIES (Pæonia Moutan).

These lovely **Tree Pæonies** are natives of Japan and very distinct from the herbaceous Pæonies, having a shrubby habit, and producing enormous flowers in early summer ; they are hardy, and thrive in most ordinary garden soils enriched with manure. In planting select positions facing S.W., well sheltered from cutting winds and protected from the morning sun.

Beautiful Japanese varieties.....*strong plants*, each 7s. 6d.

PAMPAS GRASS. See *Cortaderia*, page 66.

PANSIES, Choice Fancy, Large-flowered, a specially selected strain, flowers of bright colours and distinct markings.....per 100, 30/-; per doz. 4/- 0 5

each—s. d.
See also Bedding Violas, page 65.

PAPAVER ORIENTALE (Giant Oriental Poppies).

A Select List of the best varieties in cultivation.

For gorgeous colouring, these handsome **Giant Oriental Poppies** have few rivals amongst hardy plants. During *June* their noble foliage and large brilliant flowers produce a magnificent effect in shrubbery and herbaceous borders, or wherever large breaks of distinct and glowing colours are required.

As isolated subjects in grass, or naturalised in the wild garden, they are very effective. The flowers are greatly valued for vases, and will last long in water if cut in the early morning, when the bud is bursting, and the outer green calyx be stripped off.

We recommend *Gypsophila paniculata*, *paniculata fl. pl.*, and *Rokejeka* for intergrouping with the **Oriental Poppy**, as they come into bloom as the poppies are going over, thus maintaining a floral decoration up to *September*. Plant in *autumn or early spring*.

"	" <i>Vivid</i> , a great favourite, having rose-coloured flowers with crimson centre		1 3

BARR'S LARGE-FLOWERED PHLOXES.

A SELECT LIST OF THE BEST VARIETIES IN CULTIVATION.

For Late Summer and Autumn-flowering (August to October).

Varieties of *Phlox decussata* (*syn. paniculata*).

These grand Perennial Phloxes deserve a prominent place in all hardy flower borders, or where breaks of brilliant colours are required during *August* and *September*. When cut, their large heads of bloom go a long way in floral decorations. The colours range from *pure white* to the *richest crimson*, *pale mauve* to *deep purple* and *violet*, and from *soft rose* and *salmon* to *bright coral-red*, all having a delicate fragrance. They succeed in almost any soil enriched with manure, but are benefited by a mulching of decomposed manure in *spring*, and in hot weather by occasional soakings of water. In hot districts it is best to plant them in partial shade, the flowers lasting much longer than when grown in the full sun. If the first spikes of bloom are removed as soon as over, and the plants are given a good soaking of water, they will produce a second supply of flowers, thus continuing the display until late in *autumn*; these later blooms are often finer than the first.

BARR'S LARGE-FLOWERED PHLOXES.

The Perennial Phlox has been greatly improved during the last few years, the result being larger and bolder heads, with individual flowers twice and three times the size of those of the older kinds. The varieties offered below include the *finest of the new introductions* and only the *very best* of the older kinds.

Barr's Selections of Large-flowered Phloxes.

SAXIFRAGAS—Section I.—Encrusted Silver Saxifragas—continued.		each—s. d.
lingulata <i>Albertii</i> , producing large spreading silvery rosettes with handsome spikes of snowy white flowers, 1 ft.....		1 0
longifolia (<i>true</i>), the <i>Queen of Saxifragas</i> , with snowy white plumes 1½ ft. in length, rising from large handsome silvery rosettes; a lovely plant for crevices of rocks.....		2 6
Macnabiana , a very beautiful hybrid raised in the Royal Botanic Gardens, Edinburgh, producing spikes of large white flowers prettily spotted red, 2 ft.....		1 6
paradoxa , long leaves beautifully margined silver, and white flowers, 6 in., <i>March-April</i>		1 6

SECTION II.—MOSSY SAXIFRAGAS (*Dovedale Moss or Eve's Cushion*).

SAXIFQA WALLACEI.

These Mossy Saxifragas are all rapid growers, forming carpets of soft moss-like foliage of a bright green colour throughout winter and summer. They produce mostly from the end of *April* to *June* dainty spikes of white, rose, or crimson-coloured flowers borne on slender wiry stems 4 to 9 in. high. Those marked † are beautiful varieties raised at our Nurseries, and are great improvements on the older types. All are excellent subjects for carpeting spring bulbs, especially the dwarfer kinds.

		each—s. d.
ceratophylla (<i>Stag's - Horn Saxifrage</i>), having finely divided dark green stiff foliage, and panicles of snow-white flowers, <i>May</i> , 6 in.....	per doz., 8/-	0 9
† decipiens alba grandiflora , large white flowers, bold and showy, <i>April</i> , 5 in.....	per doz. 10/6	1 0
„ rubra grandiflora (<i>syn. Bathoniensis</i>), flowers glowing crimson, 7 in., <i>A.M. R.H.S.</i>		0 9
† Enchantress , having beautiful pale rose flowers and soft green mossy foliage, 7 in. per doz. 8/-		0 9
Guildford Seedling , glowing crimson flowers, very dwarf compact fresh green foliage, <i>April</i> , 3 in.....	per doz. 8/-	0 9
hypnoides densa (<i>Mossy Saxifrage</i>), dense cushions of fresh green foliage, flowers white, very suitable for carpeting, 4 in.....	per doz. 8/-	0 9
Juliet , flowers glowing crimson passing to rose, habit very compact, 4 in.....	„ 8/-	0 9
muscoides atro-purpurea , having rose-coloured flowers and close spreading foliage, 4 in. per doz. 8/-		0 9
Pompadour , a new mossy variety of very dwarf compact growth studded with large deep crimson flowers borne on dark-coloured stems, 6 in., <i>A.M. R.H.S. 1921</i>	per doz. 10/6	1 0
† Rosy Dawn , rose-pink, very fine, compact, dwarf habit, 4 in.....	„ 10/6	1 0
sanguinea superba , rich crimson flowers and fresh mossy green foliage, 4 in.....	„ 8/-	0 9
S. T. Wright , flowers soft creamy yellow, very distinct, 6 in.....	„ 10/6	1 0
Stormonth's White , dense green cushions studded with small white flowers, 3 in.....	per doz. 8/-	0 9
† Taplow Pink , beautiful large rose-pink flowers and fresh green foliage, 6 in.....	per doz. 10/6	1 0
† „ Rose , flowers full bright rose, very beautiful, plants of compact habit, 3 in. per doz. 16/-		1 6
trifurcata , white flowers produced on sprays 9 to 12 in. in length, prized for cutting, <i>June</i> , a late variety.....	per doz. 8/-	0 9
Wallacei , a popular hybrid variety prized for its beautiful large white flowers borne on crimson stems, fragrant, of distinct habit, <i>April-May</i> , 8 in.....	per doz. 8/-	0 9
Wenlock Best of All , flowers of a beautiful soft pink, 8 in.....	„ 8/-	0 9

SECTION III.—CUSHION SAXIFRAGAS (*Winter-flowering*).

These **Cushion Saxifragas** form dense hillocks of close foliage, from which rise dainty white or yellow flowers during *January*, *February* and *March*; they are among the earliest harbingers of spring. Height, 2 to 4 in.

		each—s. d.
apiculata , having emerald-green cushions of foliage and primrose-yellow flowers, 4 in., <i>F.C.C. R.H.S.</i>	per doz. 8/-	0 9
„ alba , a charming white-flowered variety of the above, <i>Feb.-March</i> , 4 in.....		1 0
Boryi , dense cushions of pale green rosettes, producing spikes of white flowers with golden anthers, <i>April</i> , 2 in.....		1 6

SAXIFRAGAS—Section III.—Cushion Saxifragas—continued.

SAXIFRAGA BURSERIANA
SPECIOSA.

	each—s.	d.
Burseriana magnifica , large snowy white flowers, in bloom 10 days earlier than <i>Gloria</i> , Jan.-Feb., 3 in.....	1	6
„ speciosa , flowers snow-white, a very free early blooming variety, Jan.-Feb., 3 in...per doz. 10/6	1	0
„ sulphurea (<i>new</i>), producing showy yellow flowers on dainty red stems, Jan.-Feb. 3 in., <i>extra fine</i> , A.M. R.H.S.....	2	6
Elizabethæ , a fine hybrid, with reddish stems and sulphur-yellow flowers, 6 in.....	1	0
Faldonside , the finest of the early-flowering cushion Saxifragas, producing large open pure yellow flowers with broad over-lapping sepals, rising from close tufts of silver-grey foliage, strong grower, free bloomer, February to March, 3 in., A.M. R.H.S.....	2	6
Haagii , bright yellow, Jan.-Feb., 3 in., one of the earliest and showiest of winter-flowering Alpines.....per doz. 10/6	1	0
Irvingi , dainty shell-pink flowers, produced from dense cushions of foliage, 3 in.; a beautiful garden hybrid, A.M. R.H.S.....	1	9
L. G. Godseff , bright yellow flowers, Feb.-March, 3 in.; a showy garden hybrid...per doz. 10/6	1	0
Paulinæ , having grey foliage, with reddish buds and soft yellow flowers, 3 in.....	1	9
Petraschii , forming a dense silvery cushion studded with large snowy white flowers borne on red stems, Feb.-March, 3 in., A.M. R.H.S.....	1	6
pungens , producing beautiful large clear yellow flowers from dark green cushions of foliage.....	1	6
sancta , golden flowers and emerald-green foliage in <i>spring</i> , 3 in.; it likes sun and lime.....	1	0

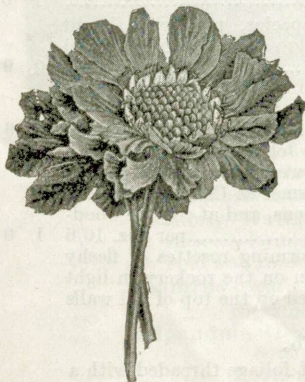

SECTION IV.—VARIOUS DISTINCT AND BEAUTIFUL SAXIFRAGAS.

granulata fl. pl. (<i>Double Meadow Saxifrage</i>), bearing beautiful double white flowers, April-May, 9 in., shade loving.....	1	0
oppositifolia alba , producing sheets of pure white flowers and Thyme-like foliage, March-April, 4 in.....per doz. 8/-	0	9
„ grandiflora , producing masses of glowing crimson flowers, larger than the type, March-April, 4 in.....per doz. 8/-	0	9
peltata (<i>Giant Californian Saxifrage</i>), a handsome plant for damp situations, having large handsome foliage and pink flowers in <i>spring</i> , 2-3 ft.....	1	6
umbrosa (<i>London Pride</i>), flowers white and pink, May-July, 1 ft.; a valuable and favourite plant, thriving in town, gardens and everywhere.....per doz. 5/6	0	6

SECTION V.—GIANT-FLOWERED AND LARGE-LEAVED SAXIFRAGAS (*Megasea*).

The following are handsome front border plants, having large bold persistent foliage, and producing during winter and early spring large showy panicles of brightly coloured flowers.

	each—s.	d.
crassifolia , flowers rosy pink, produced during <i>early February</i> , 1 ft.....per doz. 8/-	0	9
Milesii , a rare form producing trusses of white flowers, 1 ft.....	1	6
purpurea , producing large panicles of rich crimson flowers, April-May, 2 ft.....per doz. 8/-	0	9
speciosa , flowers bright crimson, March-April, foliage brilliant red in autumn, 1 ft. „ 8/-	0	9
Sunshade , producing large branching spikes of flowers of a beautiful rose shade, very handsome, March-April, 1½ ft.....	2	6
SCABIOSA caucasica (<i>Pincushion-flower</i>), a handsome border plant producing continuously from <i>early summer</i> to <i>late autumn</i> lovely heads of soft lilac-blue flowers, prized for cutting, 2-3 ft.....	0	9

SCABIOSA CAUCASICA.

SCABIOSA caucasica alba , bearing heads of beautiful white flowers, 2-3 ft.....	1	0
„ lutea , a fine border plant bearing heads of primrose-coloured flowers from <i>July</i> to <i>Sept.</i> , valuable for cutting, being very floriferous, 5 ft.....	0	9
„ gigantea , flower-heads primrose, a handsome variety, and very useful for cutting, July-Oct., 8 ft.....	0	9
„ Pterocephala (<i>syn. parnassi</i>), forming spreading tufts of grey foliage studded throughout <i>summer</i> and <i>autumn</i> with pretty mauve-purple flowers, ½ ft.; a charming plant for the rock garden or for permanent edgings...	1	0

SCHIZOSTYLIS coccinea (*The Caffre Lily* or *Crimson Flag*), a valuable hardy Cape plant, each s. d.
producing from October to November spikes of showy globular crimson-scarlet
flowers, which are prized for cutting; it delights in a sheltered situation among
trees and shrubs planted in a good deep loam, and during dry hot weather in
summer an abundance of water should be given, 1½ ft. It is also a good pot-plant
per 100, 25/-; per doz. 3/6 0 4

„ **Mrs. Hegarty** (*New Pink Caffre Lily*). This beautiful NOVELTY was shown before
the Floral Committee of the ROYAL HORTICULTURAL SOCIETY on October 18th,
1921, and was at once given an AWARD OF MERIT. The flowers are of a beautiful
satiny rose-pink, and keep on opening out in succession for a very long time. The
general habit of growth is that of *S. coccinea*; it is as hardy and requires the same
treatment. It is also a good pot-plant.....per doz. 12/6 1 3

SCIRPUS. See *Aquatics*, page 67.

SEDUM (*Stonecrop*), charming plants possessing great diversity of character, most of them
having a dwarf and spreading growth, while a few are showy border plants; for carpeting,
also for covering rockwork, walls, and ruins, few plants are so useful, as they will grow in any
situation fully exposed to the sun. Some are decorative on account of their purple, brown,
or mealy white foliage, and others for their profusion of yellow, white, or pink flowers during
summer; the dwarf varieties are extensively used for edgings and carpet-beds.

6	6	„	„	„	„		

SEDUM acre aureum (*Golden Common Stonecrop*), foliage shaded gold in early spring, flowers
golden, 3 in..... 0 9

„ **album** (*Worm Grass*), bearing pretty white flowers in June, 3 in.; a charming plant
for walls, etc.....per doz. 8/- 0 9

„ **asiaticum**, fine hardy Himalayan species, producing heads of orange-red flowers,
summer, 9 in..... 1 0

„ **corsicum**, dwarf spreading succulent growth of a beautiful blue-grey shade with
rosy hue at base, clusters of white flowers with pink buds, June-July, 3 in.
per doz. 10/6 1 0

„ **dasyphyllum**, forming dainty hillocks of grey foliage tinted pink, flowers white,
June, 2 in.....per doz. 8/- 0 9

„ **Ewersii**, charming rose-coloured flowers and glaucous grey foliage, of sub-trailing
habit, July-Sept., 4 in.; good for walls or borders.....per doz. 8/- 0 9

„ **kamtschaticum** (*Orange Stonecrop*), flowers bright yellow, June-Aug., ½ ft. „ 8/- 0 9

„ **Lydium**, of dense compact growth, assuming during winter a rich red hue, flowers
pink, June, 2 in..... 0 9

„ **obtusatum**, a handsome species from British Columbia, foliage emerald-green
shaded bronze, flowers golden, July-Aug., 3 in.....per doz. 8/- 0 9

„ **pulchellum** (*Bird's-foot Stonecrop*), flowers a pretty pink, Aug.-Sept., 3 in.; suitable
for moist situations.....per doz. 8/- 0 9

„ **rupestre**, a handsome variety of spreading habit with golden-yellow flowers and
blue-green foliage tinged russet-red during winter, July-Aug., 6 in.;
good for walls, etc.....per doz. 8/- 0 9

„ „ **grandiflorum**, a handsome variety, flowers golden-yellow, and foliage
shaded ruby-red in winter, 6 in.....per doz. 8/- 0 9

„ **sexangulare**, flowers golden, foliage dark green with bronze hue, July-Aug., 4 in.;
it makes an excellent carpet for small bulbous subjects such as Snowdrops, Chiono-
dora, etc., and is also good for wall gardening.....per doz. 8/- 0 9

„ **Sieboldii**, producing blue-grey evergreen foliage edged red, with charming rose-
coloured flowers, July-Sept.; of trailing habit..... 1 0

„ **spectabile atro-purpureum**, a handsome Japanese species, producing broad
glaucous foliage and large flat heads of crimson-purple flowers during August and
September, 1 ft.....per doz. 8/- 0 9

„ **stoloniferum coccineum** (*Crimson Stonecrop*), producing prostrate masses of
crimson flowers during July and August, ¼ ft.; an excellent rapid grower, for
clothing dry banks, mounds, etc.....per doz. 8/- 0 9

„ **Telephium Munstead Red**, a fine variety raised by Miss Jekyll, who writes:—
“The plant has green foliage and rich chocolate flowers, and makes a good
groundwork for late summer flowers of red colouring, such as Cannas, Gladioli,
etc. Also a good plant for rough rocky places, wild gardens, and at edge of wood-
lands.” It will do well in half-shade, Aug.-Sept.....per doz. 10/6 1 0

SEMPERVIVUM (*Houseleek*), succulent evergreen Alpine plants forming rosettes of fleshy
leaves varying in form and colour; all are easily grown on the rockery in light
rich soil with sunny aspect; they may also be established on the top of old walls
and roofs of old buildings.

6 in 6 beautiful named varieties, 4/6.

„ **arachnoideum** (*Cobweb Houseleek*), producing rosettes of foliage threaded with a
white cobweb-like down, 4 in..... 0 9

SEMPERVIVUM—continued.

	each—s.	d.
„ <i>Boutignyanum</i> , having green rosettes with bronze shading, strong grower.....	0	9
„ <i>calcareum</i> , producing blue-green rosettes with purple tips, 3 in. handsome.....	1	0
„ <i>obscurum</i> , strong free-growing variety, deep olive-green, tipped purple.....	0	9
„ <i>triste</i> (<i>Red-leaved Houseleek</i>), a handsome variety, 6 in., F.C.C. R.H.S.....	1	0

SENECIO Clivorum Orange Queen (new), producing large branching heads of handsome star-shaped rich orange-yellow flowers, very showy, *July-Sept.*, 4 ft.; a grand plant for wild gardens and waterside.....per doz. 16/-

„ *tanguticus*, bold pyramidal heads of golden-yellow flowers, *July-Sept.*, 5 ft., A.M. R.H.S.; a handsome plant for partial shade and wild gardening.....per doz. 8/-

SHORTIA galacifolia, a most beautiful North American plant, bearing graceful little bell-shaped flowers opening white and dying off rose, foliage evergreen, assuming a rich colour in autumn and winter, *April-May*, $\frac{1}{2}$ ft..... 2 6

SIDALCEA, charming border plants producing stately spikes of flowers *July to Sept.*

„ *candida*, producing handsome spikes of satiny white flowers, 3 ft..... 0 9

„ *Listeri*, having spikes of beautiful shell-pink flowers with a satiny lustre and prettily fringed, very effective, 4 ft..... 1 0

„ *Rosy Gem*, bright rose, showy and very free blooming, 3 ft., A.M. R.H.S..... 0 9

„ *Sussex Beauty*, large open pale pink flowers, a distinct and charming plant, $2\frac{1}{2}$ ft. 2 0

SILENE (*The Catchfly*). The following are charming rock plants.

„ *acaulis* (*Moss Campion*), forming dense green cushions studded with miniature stemless pink flowers like small stars, *May-June*, 3 in..... 0 9

„ *maritima* fl. pl. (*Double-flowered Witch's Thimble*), producing large double white flowers throughout summer, of prostrate habit, 6 in.: excellent for walls and rock garden.....per doz. 8/- 0 9

„ „ *rosea*, flowers blush-pink with large inflated calyx resembling a thimble. per doz. 8/- 0 9

„ *Saxifraga*, producing white flowers resembling a miniature single pink, and close dwarf grass-like spreading growth, *Aug.*, 6 in.....per doz. 8/- 0 9

„ *Schafta*, flowers bright rose, *July-Oct.*, 4 in..... „ 8/- 0 9

SISYRINCHIUM anceps Celeste (*Blue-eyed Susan*), producing dainty blue flowers, *May-July*, 4 in.; a gem for crevices of stone paths, and rockwork..... 1 0

SOLIDAGO (GOLDEN ROD).

SOLDANELLA alpina (*Blue Moonwort*), a lovely high Alpine, bearing numerous small pendent blue flowers, bell-shaped and daintily fringed, *April-May*, 4 in.....per doz. 10/6 1 0

SOLIDAGO (*Golden Rod*), equally suitable for the flower border, wild garden, or waterside.

„ *Canadensis nana* (*Dwarf Golden Rod*), having golden plumes of flowers, *Aug.-Sept.*, 2 ft.; suitable for rock garden or front row of border..... 1 0

„ *Golden Wings*, the finest of the *Golden Rods*, producing a shower of gracefully arched sprays of golden flowers on stiff erect stems, *Aug.-Sept.*, 6 ft., A.M. R.H.S.....per doz. 8/- 0 9

SOLOMON'S SEAL. See *Polygonatum*.

SPARTIUM junceum (*Golden Summer-flowering Rush-leaved Broom*), excellent for back of flower borders, etc., 8-10 ft., in bloom from *June to October*..... 1 6

SPIRÆAS (*Meadow Sweet*), handsome perennials equally suitable for the flower border or water-side, producing graceful plumes of flowers from *June to August*.

„ *Aitchisoni*, a beautiful shrub producing large terminal plumes of white flowers, and graceful fern-like foliage, strong grower, 7 to 8 ft.....1/6 & 2 6

„ *Anthony Waterer*, a handsome shrubby species with bright crimson flowers during summer, forming bushes $1\frac{1}{2}$ to 2 ft. in height; equally good for borders, rock, and bold wall gardening..... 1 6

„ *Aruncus* (*Goat's Beard*), flowers white, handsome border plant, *June-July*, 5 ft..... 1 0

„ „ *plumosus*, an improved form of the above..... 1 6

„ *filipendula* (*Dropwort*), producing corymbs of snowy-white flowers, valued for cutting; a showy border plant, 2 ft.....per doz. 8/- 0 9

„ „ *flore-pleno* (*Double-flowered Dropwort*), bearing corymbs of double white flowers, *June-Aug.*, $1\frac{1}{2}$ ft..... 0 9

SPIRÆAS—continued.

„	<i>Fire Globe</i> , flowers fiery orange-red, very fine, 2 ft.....	1	6
„	<i>Orange Globe</i> , large and handsome, rich glowing orange, <i>extra fine</i> , 2 ft. 1	6	
„	<i>T. Smith</i> , beautiful large yellow flowers, a magnificent variety, 2 ft. 1	6	
„	<i>Barr's Mixed Hybrids</i> , large-flowered.....per doz. 8/-	0	9

TROPÆOLUM *speciosum*. See *Climbers*, page 72.

TUNICA *Saxifraga splendens*, soft pink, a pretty rock and wall plant, *June-Sept.*, $\frac{1}{2}$ ft.per doz. 8/- 0 9

TYPHA (*Reed Mace*). See *Aquatics*, page 67.

each—s. d.

UVULARIA sessifolia (*Bellwort*), nodding yellow Lily-like flowers borne on slender stems, May-June, 6 in. ; charming for shady places in the rock garden..... 1 6

VERBASCUM.

VERBASCUM (*Mullein*), handsome border plants, producing stately spikes of flowers from June to Sept.

6 in 6 beautiful named varieties, 5/6

„ **A. M. Burnie**, flowers a lovely soft rosy buff; a sport from **V. Caledonia**, of elegant branching habit, 4 ft..... 1 0

„ **Amber Gem**, rich amber-coloured flowers with purple anthers on long branching spikes, 3 ft. per doz. 10/6 1 0

„ **Caledonia**, flowers coppery buff, shot with purple, showy, 4 ft..... per doz. 10/6 1 0

„ **Chaixii**, canary-yellow with mauve centre, long handsome spikes of bloom; a first-class border plant and a noble subject for grouping on lawns, etc., 6 ft..... per doz. 8/- 0 9

„ **Cotswold Queen**, see *New and Noteworthy Plants*, page 8..... 2 6

VERBASCUM densiflorum, flowers rich golden-bronze with striking mauve eye, very effective; a true perennial, blooming continuously from June to Oct., 4 ft. per doz. 10/6 1 0

„ **Ivanhoe**, large creamy buff flowers, shot copper with copper buds and reverse, and having glaucous foliage, very striking, 4 ft..... 1 6

„ **Miss Willmott**, pure white flowers over 2½ in. in diameter, biennial, 5 ft..... 0 9

„ **phlomoides**, showy spikes of large golden-yellow flowers, 5-6 ft., hardy biennial... 0 9

VERBENA chamædrifolia, producing a continuous supply of flowers of a dazzling scarlet from May to Oct., habit dwarf and spreading; an invaluable rock plant or for sunny beds and borders, 3 in., **A.M. R.H.S.**..... per doz. 8/- 0 9

„ **venosa**, bearing rich violet-coloured flowers, continuous bloomer; a valuable plant for front of borders, June-Oct., 10-15 in..... per doz. 8/- 0 9

VERONICA (*Speedwell*), charming border, Alpine and rock plants.

„ **incana**, silvery grey foliage and violet-blue flowers, June-Aug., ½ ft.... per doz. 8/- 0 9

„ **longifolia**, producing spikes of blue flowers, July-Aug., 2 ft..... „ 8/- 0 9

„ **repens**, clothing the ground with a carpet of bright green foliage throughout the year, and in spring covered with pale blue flowers, 2 in.; valuable for dry banks, rockwork, and for covering graves, etc..... per doz. 8/- 0 9

„ **spicata alba**, having spikes of pure white flowers, July-Sept., 1½ ft..... 1 0

„ „ **rosea**, having spikes of pretty rose-pink flowers, July-Aug., 1½ ft. 1 0

„ „ **Royal Blue** (syn. *amethystina*), flowers gentian-blue, produced in great profusion, very showy, June-July, 1 ft..... per doz. 8/- 0 9

„ **subsessilis**, flowers rich violet-blue, handsome, July-Sept., 3 ft..... 1 6

„ **taurica**, a charming little species forming dark green tufts of foliage with gentian-blue flowers; a fine rock and wall plant, 3 in..... 0 9

„ **Teucrium dubia** (syn. *prostrata* and *rupestris*), brilliant blue; a good plant for permanent edgings, etc., May-June, 6 in..... per doz. 8/- 0 9

„ „ **Trehane**, light blue flowers, golden-yellow foliage, 4 in.... per doz. 8/- 0 9

„ **True Blue**, producing a cloud of intense blue flowers, one of the brightest of blue flowers, very showy, June-July, 1 ft..... per doz. 10/6 1 0

„ **virginica alba** (*Great Virginian Speedwell*), white flowers, tall grower, 6 ft..... 0 9

For *Shrubby Veronicas*, see *Wall Shrubs*, etc., page 72.

VINCA (*Periwinkle*), for rough places in rock gardens and for growing under trees.

„ **major**, producing large foliage and bright blue flowers, June-Sept., 1½ ft..... 0 6

„ „ **elegantissima**, large handsome gold and green variegated foliage..... 0 9

„ **minor azurea plena**, bearing pretty double blue flowers, June-Sept..... 1 0

VIOLAS, charming subjects for the rock and Alpine garden.

„ **cornuta alba**, flowers snow-white, profuse bloomer, 6 in..... per doz. 5/6 0 6

„ „ **purpurea** (*Horned Viola*), continuous bloomer, flowers slaty blue, elegant and pretty 6 in., **A.M. R.H.S.**..... per doz. 5/6 0 6

„ **gracilis**, a lovely species from Greece, of graceful trailing habit, flowers intense violet-blue, a charming rock plant, May-Aug., 4 in., **A.M. R.H.S.**..... per doz. 6/6 0 7

„ „ **Huntercombe Purple** (*new*), flowers rich purple, much larger and finer than **gracilis** continuous bloomer, a fine bedding and border plant, 4 in., very showy..... per doz. 7/6 0 8

BEDDING VIOLAS.

each—s. d.

VIOLAS (*Tufted or Bedding Pansies*). For Flower-beds, Borders, Edgings, etc. The following is a selection of the best and freest blooming bedding varieties; all are of good, distinct, clear colours, and sweetly scented.

Amy Barr, deep rich ruby-purple with lighter shading towards centre	per 100, 21/-; doz. 3/-	0 4
Archie Grant, indigo-blue, a favourite bedding variety	„ 21/-; „ 3/-	0 4
Bridal Morn, soft heliotrope-blue, A.M. R.H.S.	„ 21/-; „ 3/-	0 4
Jackanapes, bright golden-yellow, upper petals bright mahogany-brown, very distinct and showy, a fine bedder	per 100, 35/-; doz. 5/-	0 6
J. B. Riding, a rich crimson shade, of good habit, profuse bloomer	„ 21/-; „ 3/-	0 4
Kitty Bell, pale silvery mauve, fine close bedder	„ 21/-; „ 3/-	0 4
Klondyke, clear yellow, rayed, good bedder	„ 21/-; „ 3/-	0 4
Maggie Mott, soft violet-blue, deliciously fragrant	„ 21/-; „ 3/-	0 4
Mrs. Airdie, lemon-yellow, early	„ 21/-; „ 3/-	0 4
Mrs. Chichester, white-edged purple, very showy, a great favourite	per 100, 21/-; doz. 3/-	0 4
Newton Mauve, the finest of the mauve varieties, of good bedding habit	per 100, 21/-; doz. 3/-	0 4
Primrose Dame, soft primrose-yellow, a fine bedder	„ 21/-; „ 3/-	0 4
Swan, rayless white self, fine bedder	„ 21/-; „ 3/-	0 4
William Haig, violet-blue, fine bedder	„ 21/-; „ 3/-	0 4
William Neil, soft rosy-mauve, fine bedder	„ 21/-; „ 3/-	0 4
William Norris, clear purple self, good bedder	„ 21/-; „ 3/-	0 4

Barr's Self-coloured Bedding Violas.

Purple	per 100, 21/-; per doz. 3/-	Pale Blue	per 100, 21/-; per doz. 3/-
Deep Mauve	„ 21/-; „ 3/-	Golden-Yellow	„ 21/-; „ 3/-
Dark Blue	„ 21/-; „ 3/-	Pure White	„ 21/-; „ 3/-
Mixture of various assorted colours	per 100, 17/6; per doz. 2/6		—

VIOLA ODORATA, Sweet-scented Violets. The varieties offered below are among the best and most distinct. The double-flowered varieties are more suitable for frame culture than outdoors, except in sheltered gardens.

„ Admiral Avellon, rich reddish purple, single flowers	per doz. 8/-	0 9
„ Czar White, single, pure white	„ 8/-	0 9
„ Governor Herrick (<i>new</i>), deep rich violet-purple single flowers, borne on long stout stems, <i>extra fine</i>		1 0
„ La France, large rich blue single flowers, borne on long stalks	per doz. 8/-	0 9
„ Lady Hume Campbell, flowers double, lavender-blue, vigorous grower	„ 10/6	1 0
„ Marie Louise, very large double flowers, lavender-blue	„ 8/-	0 9
„ Perle Rose, single rose-coloured flowers, sweet-scented; habit dwarf, free blooming, very hardy; charming for the rock and alpine garden	per doz. 8/-	0 9
„ Princess of Wales, very large single rich violet-blue flowers, borne on long sturdy stalks, A.M. R.H.S.	per doz. 8/-	0 9
„ Old Irish double Purple		1 6

Specially prepared clumps of Violets for forcing supplied in Autumn at double price.

WAHLENBERGIA serpyllifolia major (syn. *Edraianthus*), the large-flowered Thyme-leaved Harebell, a lovely Alpine, producing large rich violet-blue bell-shaped flowers; of dwarf trailing habit, 4 in., *May-June*.....per doz. 16/- 1 6

WALLFLOWERS, SINGLE—Strong bushy transplanted plants.

„ Covent Garden Blood-Red or Vulcan, 1 ft.	per 100, 15/-; per doz. 2/3	—
„ „ „ Golden-Yellow, 1 ft.	„ 15/-; „ 2/3	—
„ Eastern Queen, flowers opening a chamois colour and developing to a salmon-rose, 1 ft.	„ 15/-; „ 2/3	—
„ Primrose Monarch, flowers a soft primrose, 1 ft.	„ 15/-; „ 2/3	—
„ Ruby Gem, ruby-violet, forming a charming contrast to the yellow varieties, 1 ft.	„ 15/-; „ 2/3	—

WATER LILIES. See *Nymphæas*, pages 67 to 68.

YUCCA filamentosa (*Adam's Needle-and-Thread*), a stately plant for lawns, etc..... 2 6

ZAUSCHNERIA californica (*Californian Fuchsia*), producing deep scarlet tubular flowers, *Sept.*, 9 in., a handsome little plant for sunny walls and rockwork..... 1 0

„ californica mexicana, flowers fiery scarlet, *Aug.-Sept.*, 1 ft.; suitable for hot sunny positions on rockwork..... 1 0

HARDY ORNAMENTAL GRASSES, REEDS, ETC.

For planting by the side of Streams, Lakes, Ponds, etc., or grouping in the Flower and Shrubbery Borders.

These hardy ornamental Grasses, etc., are invaluable as a background and for intermingling in the herbaceous flower border, where they impart a light and graceful effect. *Arundo*, *Elymus*, and the varieties of *Miscanthus*, will be found especially useful for grouping in association with such subjects as *Kniphofias*, *Montbretias*, etc.

The beauty of *Iris* plantations is considerably enhanced by the addition of Ornamental Grasses and Reeds.

	each—s.	d.
ARUNDO donax (<i>The Giant Provence Reed</i>), a giant reed attaining a height of 12 ft., for sunny situations. Protect crowns during winter with a covering of long manure.....	1	6
CORTADERIA argentea (syn. <i>Gynerium argenteum</i>) (<i>Pampas Grass</i>).....		
" " monstrosum , immense white plumes, the finest of all the Pampas grasses	3	6
" " pumila large erect silvery plumes, <i>Sept.-Oct.</i> , 8 ft.....	1	6
" " rosea , producing in <i>autumn</i> rose-tinted plumes, 7 ft.....	2	6
DACTYLIS glomerata elegantissima (<i>Variegated Cock's-foot Grass</i>), a pretty dwarf silver and green variegated grass for permanent edgings, etc., 6 in.....	per doz.	8/-
ELYMUS arenarius (<i>Blue Lyme Grass</i>), prized for cutting to associate with flowers, also excellent for borders, 2 ft.....	per doz.	8/-
FESTUCA glauca , a pretty dwarf bluish grey grass of erect habit, suitable for rock gardens and dry situations, 9 in.....	per doz.	8/-
GYNERIUM argenteum , see <i>Cortaderia</i> above.		
MISCANTHUS (<i>Eulalia</i>), graceful Japanese Grasses with plumes of purplish flowers in <i>late summer</i> , foliage prized for cutting, 4-5 ft.; a valuable plant for flower borders, water-side, and for planting on lawns, etc.		
" gracillima , having graceful, arching, narrow green foliage, 5 ft.....	1	6
" japonica zebrina , foliage green, marked crossways with yellow bars; distinct and very effective, 5 ft.....	2	6
" " stricta , foliage green with broad golden bars; of stiff erect habit, 4 ft.	2	6
PHALARIS arundinacea variegata (<i>Golden-variegated Gardener's Garter</i>), a valuable variegated grass for cutting, or for flower borders, water-side, etc., 2½ ft.....	per doz.	8/-

HARDY AQUATICS & MOISTURE-LOVING PLANTS.

For planting by the side of Streams, Lakes, Ponds, etc.

In addition to the Aquatics offered below, the following are also suitable for planting in damp situations and near to water, being moisture-loving plants:—*Asters*, *Bupthalmum speciosum*, *Cardamine pratensis* fl. pl., *Dodecatheon*, *Epilobium*, *Ferns*, *Funkias*, *Gunnera*, *Helenium*, in variety, *Hemerocallis*, *Irises* for water-side, *Liatris*, *Lobelia*, *Lysimachia*, *Lythrum*, *Mimulus*, *Monarda*, *Petasites*, *Phormium tenax*, *Physostegia speciosa*, *Polygonum sachalinense* and other varieties, *Primula*, *Saxifraga peltata*, *Senecio*, *Solidago*, *Spiræas*, and *Trollius*. For prices and descriptions see body of Catalogue.

	each—s.	d.
ACORUS gramineus fol. var. (<i>Miniature Sweet Flag</i> or <i>Myrtle Sedge</i>), with prettily variegated foliage for edges of small rock pools, 1 ft.....	1	0
APONOGETON distachyon (<i>Water Hawthorn</i> or <i>Cape Pond Weed</i>) flowers pure white, strongly hawthorn-scented, produced throughout the summer months into late autumn. Plant in 2 to 3 ft. of water either in sun or partial shade.....	1	0
BUTOMUS umbellatus (<i>Flowering Rush</i>), producing umbels of rose-pink flowers borne on spikes, 4 ft. high.....	0	9
CALLA palustris (<i>Marsh Calla</i> or <i>Bog-Arum</i>), flowers white, resembling a small Arum Lily, habit dwarf and spreading.....	0	9
CALTHA (<i>Marsh Marigold</i> or <i>King Cup</i>). For shady or sunny situations.		
" palustris , flowers golden-yellow, <i>Mar.-April</i> , 1 ft.....	0	9
" polypetala , a giant <i>King Cup</i> from the East, producing large leaves measuring 1 foot across from which arise a continuous supply of large handsome cup-shaped golden flowers borne on stout stems <i>throughout summer</i> , 3 ft. A.M. R.H.S.....	2	6
HOTTONIA palustris (<i>Water Violet</i>), having pretty submerged fern-like foliage and producing at water-level dainty white flowers; a good plant for fish.....	0	9
LIMNANTHEMUM peltatum (syn. <i>Villarsia nymphaeoides</i>), the <i>Golden-flowered Fringed Buck-Bean</i> , very pretty nymphaea-like mottled foliage with neat golden-yellow flowers held 4 in. above the water, excellent for tubs or shallow water.....	1	0
MENYANTHES trifoliata (<i>Bog-Bean</i>), producing 1 foot above water-level spikes of daintily fringed white flowers with pretty nymphaea-like mottled foliage.....	1	0
NUPHAR luteum (<i>Common Yellow Water Lily</i> or <i>Brandy Bottle</i>), a decorative water plant with bright green foliage.....	1	6

Hardy Aquatics & Moisture-loving Plants—continued.

each—s. d.

ORONTIUM aquaticum (<i>Golden Club</i>), producing in <i>early summer</i> golden flower-heads rising 12 to 18 in. out of the water.....	2 0
PARNASSIA palustris (<i>Grass of Parnassus</i>), a dainty and rare native plant for damp places, bearing small creamy white flowers, $\frac{1}{2}$ ft.....	1 0
PONTERERIA cordata (<i>Water Plaintain of Jamaica</i>), producing spikes of blue flowers, rising 2 ft. out of the water, borne on bright green arrow-head shaped foliage, very handsome.....	1 6
RANUNCULUS aquatilis , a floating native aquatic with pretty small white flowers.....	0 9
„ Lingua (<i>Giant Golden Spearwort</i>), having glistening yellow flowers, 4 ft.....	0 9
SAGITTARIA variabilis (syn. <i>japonica</i>), (<i>The Snowy-flowered Arrow Head</i>), July-Oct., 2 ft... ..	1 0
„ variabilis fl. pl. (<i>The Double Snowy-flowered Arrow Head</i>), $1\frac{1}{2}$ ft., F.C.C. R.H.S. ...	1 6
SCIRPUS lacustris (<i>The Tall or Greater Bull Rush</i>), a handsome plant for the water's edge, producing a fine bold effect, 5-6 ft.....	1 0
TYPHA latifolia (<i>Giant Reed Mace</i>), a handsome plant, producing in <i>late summer</i> long bold spikes of brownish black flowers rising out of a stately broad blue-green foliage, 6-7 ft.; often erroneously called <i>Bull Rush</i>	0 9
VILLARSIA nymphæoides (<i>The Fringed Buck-bean</i>), (syn. <i>Limnanthemum</i>), see page 66.....	1 0

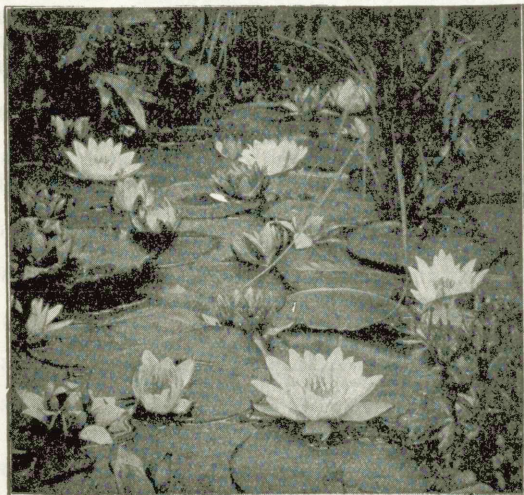

HARDY HYBRID WATER LILIES (NYMPHÆAS).

These **New Hardy Water Lilies** are of fascinating beauty. Their colours embrace the most vivid crimsons, the softest of pinks and roses, delicate creams, rich yellows and snowy whites, while some have charming blendings of more than one shade; in many cases their beauty is enhanced by prominent golden stamens, while others are fully double and resemble giant roses.

A sheet of water covered with these lovely **Water Lilies** presents a sight not readily forgotten—resembling, as it were, groups of brilliantly coloured stars spread over the water's surface, and relieved by a background of handsome rich green or crimson and bronze foliage.

The introduction of these beautiful **Hardy Water Lilies** into the Rock or Herbaceous

garden is strongly recommended, and can be easily arranged for even in small gardens, by sinking wooden tubs into the ground. These should be thoroughly well pitched inside and out to make them water-tight and preserve the wood; tar must not be used, as the gases thrown off by the tar are detrimental to plant life. The smaller growing varieties should be used, such as **Laydekeri**, **Paul Heriot**, **pygmæa Helvola** and **Seignoureti**. Plant them in 6 to 9 inches of good fibrous loam. A series of these sunk tubs along the foot of the rock-garden or in front of the herbaceous border produces a charming effect, especially if the tubs of *Nymphæas* are alternated with *Reeds*, *Butomus umbellatus* (*Flowering Rush*), *Scirpus*, *Typha*, *Ranunculus Lingua*, and *Sagittaria*, while Japanese Primulas, etc., may be grouped at the back and between the tubs. Another plan is to make concrete basins with an overflow or outlet at one side, so as to produce a gentle flow when adding fresh water; this should only be given when necessary, as a sudden change of temperature is apt to check growth.

NYMPHÆA TUBEROSA RICHARDSONII.

Culture, Method of Planting, etc.

These **New Hybrid Water Lilies** have proved to be hardy both in this country and the United States of America, where they are grown with great success, although subject to severer winters than we experience in this country; but where they are grown in tubs or small basins it would be advisable to give some slight protection during very severe and prolonged frosty weather.

SITUATION.—*Nymphæas* are best planted in the full sun, and succeed best in still water. When grown in artificial basins, etc., it is a mistake to add fresh water frequently, as it is apt to chill the plants, and *Nymphæas* do not flower well until the water is well warmed by the sun. They strongly resent cold water from a spout or fountain jet falling upon the foliage, which is apt to check growth.

When planted in streams and rivers, basins or creeks, they should be protected from any rush of water which might otherwise tear or damage the leaves or even wash away the plants.

SOIL.—Any kind of soil such as is found at the bottom of lakes will suit the *NYMPHÆA*, but where a soil has to be provided, we recommend good fibrous loam with the addition of a little well-decayed stable or cow manure and old leaf-soil. A depth of 9 to 12 in. of good soil is sufficient.

DEPTH TO PLANT.—A depth of 1 to 2 ft. of water above the crowns is sufficient for all kinds of *Water Lilies*. For the less rampant growers, such as *N. Laydekeri purpurata*, *N. odorata maxima*, *N. pygmæa Helvola*, etc., 12 to 18 in. of water above the crowns is quite sufficient, while the stronger growers, such as varieties of *N. Marliacea*, *N. alba*, etc., are best grown in a depth of 2 to 4 ft. of water above the crowns. We have seen the stronger growing *Nymphæas* flourishing in a depth of 4 to 5 ft. of water.

NYPHÆAS (Water Lilies)—continued.

METHOD OF PLANTING.—In lakes or ponds over 2 ft. deep, raised mounds or open brick structures should be built up so as to bring the roots within the required depth. If this is not practicable, plant in baskets and sink where required. Except when previously planted in baskets, place a sod of good fibrous loam over the roots, leaving only the crown exposed; this will keep them in position until established. **We can supply baskets and plant them ready for sinking at a charge of 2/6 per plant.**

TIME OF PLANTING.—The best time to plant Nymphaeas is from the middle of April to the end of June. *Orders are booked for delivery during this period.*

VARIETIES TO PLANT.—Care should be taken in selecting suitable sorts for small basins, as some kinds, such as the *N. Marliacea* varieties, make too strong a growth for this purpose. The following varieties are the best to use where space is limited:—*N. Laydekeri* varieties, *N. Ellisiana*, *N. James Brydon*, *N. Paul Heriot*, *N. sanguinea*, and *N. pygmæa Helvola*; the last named is a miniature Chinese species, and should have a place in every small aquarium, associated with *Aponogeton*, see page 66. The varieties of *N. odorata* and *tuberosa* are natives of America, and flower best in warm sunny districts.

CONFEROID GROWTH IN TANKS AND PONDS.—This objectionable slimy green growth, which many people are troubled with in their tanks and ponds during spells of hot dry weather, can be got rid of, without injury to plants or fish, by the introduction of copper sulphate crystals placed in a coarse bag and drawn to and fro across the pond. The quantity should be at the rate of 2½ ozs. to 10,000 gallons of water. To estimate the bulk of water multiply together the average breadth and length and the result by the average depth, all expressed as feet; then multiply this by 6½, the final result being number of gallons. If first application does not suffice, repeat in a week or ten days.

NYPHÆAS (Hardy Hybrid Water Lilies).

each—s. d.

<i>alba</i> (<i>The Large White Water Lily</i>), the gem of our native aquatics; it may be planted at a greater depth than the other varieties if required.....	2	6
<i>atro-purpurea</i> , flowers intense crimson with golden anthers, foliage a dark purplish shade; a valuable acquisition.....	12	6
<i>Attraction</i> , the deepest coloured Nymphaea, deep garnet-red flowers, outer petals flaked rose, sepals flesh streaked garnet, anthers scarlet and gold, very handsome.....	21	0
<i>candida</i> , medium-sized pure white flowers; a native of Bohemia.....	5	6
<i>colossea</i> , large flesh-coloured sweet-scented flowers, strong grower, A.M. R.H.S.....	7	6
<i>Ellisiana</i> , flowers brilliant vermilion-red, bright orange-coloured stamens, A.M. R.H.S.....	10	6
<i>Escarboucle</i> , handsome flowers of immense size, brilliant vermilion-red, with deep vermilion stamens, one of the finest Nymphaeas, A.M. R.H.S.....	15	0
<i>Gladstoniana</i> , a strong-growing variety producing enormous snowy-white flowers with conspicuous golden anthers, early flowering.....	6	6
<i>Graziella</i> , orange-red striped green with orange-coloured stamens, foliage marbled brown.....	6	6
<i>James Brydon</i> , flowers of perfect globular form and large size, colour a beautiful soft rosy red; strong grower and very free bloomer, A.M. R.H.S.....	10	6
<i>Laydekeri purpurata</i> , flowers flesh heavily mottled and deepening to crimson towards centre, stamens orange-red, a telling colour.....	7	6
<i>Marliacea albida</i> , producing neat ivory-white flowers with golden stamens, a strong grower and profuse bloomer, F.C.C. R.H.S.....	7	6
„ <i>carnea</i> , very large and vanilla-scented, delicate soft pink shading to white, with golden stamens; a strong grower and free bloomer, A.M. R.H.S.....	5	6
„ <i>chromatella</i> , flowers large and fragrant, primrose-yellow suffused rose with dark brown foliage; a strong grower and free bloomer, F.C.C. R.H.S.....	7	6
„ <i>rosea</i> , producing large delicately scented flowers opening soft flesh-pink, changing to bluish-white, and having yellow stamens; a strong grower and free bloomer, A.M. R.H.S.....	5	6
<i>Moorei</i> , the finest yellow Water Lily, flowers large, of a soft clear yellow, foliage marbled brown good grower.....	12	6
<i>Newton</i> , large open star-shaped flowers, similar to a cactus dahlia, outer petals flesh-rose, inner petals rosy vermilion with huge golden centre; the whole flower passes with age to rosy vermilion, very fine.....	21	0
<i>odorata maxima</i> (syn. <i>gigantea</i>), the <i>Rice Field Water Lily</i> of North Carolina with handsome foliage and producing large pure white cup-shaped flowers with conspicuous golden centre, very fine.....	3	6
<i>Paul Heriot</i> , producing magnificent flowers, light yellow shaded soft rose.....	8	6
<i>pygmæa Helvola</i> , bearing miniature sulphur-yellow flowers, leaves daintily marked with bronze, profuse bloomer; one of the smallest of Water Lilies and a gem for small aquariums, tubs, and shallow water, now very scarce.....	10	6
<i>Sanguinea</i> , rosy vermilion flowers, outer petals rose with orange-red stamens, A.M. R.H.S.....	12	6
<i>Seignoureti</i> , producing flowers of medium size, primrose shading to rosy crimson, rising 5 to 6 in. above the water.....	7	6
<i>Somptuosa</i> , immense flowers, rosy pink with deeper centre and rich orange stamens.....	8	6
<i>tuberosa Richardsonii</i> , having very large double white globe-shaped flowers of exquisite form, which stand well out of the water.....	5	6
„ <i>rosea</i> (syn. <i>Brakeley</i>), flowers very large and handsome, standing well out of the water, colour soft rose-pink, with orange stamens, exquisitely fragrant.....	6	6

HARDY CLIMBERS AND WALL SHRUBS.

For Training on Walls, Balconies, Arches, Trellis-work, Pillars, Pergolas, Etc.

As a guide to our customers, where necessary, we indicate after the descriptions the most suitable positions for the various species:—N. = North aspect; S. = South aspect; E. = East aspect; W. = West aspect.

AMPELOPSIS (*Virginian Creeper*), now included under *Vitis*. See page 72. each—s. d.

✓ BERBERIS *stenophylla*, orange-yellow flowers during summer followed by purple berries, one of the most beautiful plants for making an impassable hedge.

Extra strong, transplanted 2/6 to 4 6

BIGNONIA. See *Tecoma*, page 72.

BUDDLEIA. Handsome free-flowering shrubs for south walls, and the back of flower borders, shrubberies, etc. The *Variabilis* varieties should be cut back early in spring to within 12 inches of the ground, as they bloom best on the same summer's growth.

„ *globosa* (*Orange-ball Tree*), growing to a height of 10-12 ft. and very decorative in early summer..... 2 6

„ *variabilis magnifica*, having racemes of violet-coloured sweet-scented flowers summer to autumn, foliage grey, very fine, S. or W..... 2 6

„ „ *Taplow variety* (*new*), producing large spikes of well-formed rich purple fragrant flowers, very handsome, S. or W..... 2 6

„ „ *Veitchianus*, producing long sprays of deliciously scented lilac flowers, beautiful, S. or W., F.C.C. R.H.S..... 2 6

CEANOTHUS (*Blue Bush*), beautiful on south walls, or grown as a flowering shrub.

„ *azureus Gloire de Versailles*, producing large sprays of light blue flowers, summer to autumn, S., A.M. R.H.S. 1925..... 3 6

„ *Veitchianus* (*true*), having dark evergreen foliage and dense clusters of pretty bright blue flowers in early summer, S., A.M. R.H.S. 1925..... 3 6

CHOISYA *ternata* (*Mexican Orange-Flower*), evergreen, covered in early summer with clusters of deliciously fragrant white flowers; a beautiful wall shrub, S. or W..... 2/6 3 6

CISTUS *cypricus*, a lovely evergreen shrub for sunny walls or borders, producing large snowy-white flowers with maroon-coloured blotch at base of petals, June-July, 4 ft., S..... 2 6

CLEMATIS (*Climbing Varieties*). These beautiful hardy Climbers are indispensable for walls, trellis-work, arches, festoons, or for training on poles, etc., while on rockwork, or rambling over the stumps of old trees, they are very effective. N. or S.

CLEMATIS, *Jackmanni* Section.—The varieties offered in this section produce masses of single flowers of large size on the summer shoots, from July to October. The plants may be freely pruned.

„ *Comtesse de Bouchaud*, flowers soft carmine-rose, very free bloomer..... 3 6

„ *Gipsy Queen*, having bright rich velvety purple flowers, handsome..... 3 6

„ *Jackmanni*, intense violet-purple, a general favourite; excellent for North aspect... 3 6

„ „ *alba*, pure white, very free..... 3 6

„ „ *superba*, producing large, broad-petalled, rich purple flowers, handsome.. 3 6

„ *Mad. Baron Veillard*, flowers deep rose, distinct and beautiful..... 3 6

„ *Mad. Edouard André*, a handsome and attractive variety bearing in abundance flowers of a velvety rosy claret..... 3 6

„ *Mrs. Cholmondeley*, lavender slightly tipped purple, a great favourite..... 3 6

CLEMATIS, *Lanuginosa* Section.—The flowers in this section are large, handsome, and perfectly formed, producing in succession on short lateral shoots during summer and autumn. The plants should be moderately pruned.

„ *Beauty of Worcester*, flowers clear blue with white anthers..... 3 6

„ *Henryi*, bearing large creamy white flowers of fine form..... 3 6

„ *lanuginosa*, flowers very large of a beautiful soft mauve..... 3 6

„ *Nellie Moser*, flowers shell-pink with rose-coloured bar running down petals..... 3 6

CLEMATIS, *Viticella* Section.—The varieties in this section are of vigorous growth, flowering in profusion during summer and autumn. Flowers of medium size and produced in graceful clusters. Prune according to requirements.

„ *kermesina*, flowers of medium size of a bright wine-red colour, attractive..... 3 6

„ *Ville de Lyon*, flowers vivid crimson, showy, A.M. R.H.S..... 3 6

CLEMATIS, *Small-flowered Section*.—The flowers of these range in size from that of a shilling to a half-crown piece. The varieties of *C. montana* are rapid, vigorous growers, and smothered in blossom during May and June.

„ *flammula* (*Sweet-scented Virgin's Bower*), producing clusters of small pure white flowers, deliciously scented, Aug.-Sept..... 3 6

„ *montana*, flowers white, the size of a shilling, produced in great profusion during May, S.; a creeper of rapid growth..... 3 6

„ „ *rubens*, charming rosy pink flowers, foliage shaded purple-bronze with silvery veining; a very free, rapid grower, S., F.C.C. R.H.S..... 3 6

Barr's Hardy Perennials

Rock Plants, Alpines, Aquatics, Etc.

From a photograph, by kind permission of THE GARDEN.

Aster Barr's Pink.

The finest Pink Michaelmas Daisy yet raised.

"Until lately one had to exercise a certain amount of imagination with the pink Michaelmas Daisies, which had more mauve than pink in their colouring. But now the pinks are really and truly pink, and of the newest varieties none is more prominent than Barr's Pink, which, with great beauty of rich colouring, combines a graceful habit, and one recognises that in this Messrs. Barr and Sons of Covent Garden have raised a variety that will long continue in the front rank of hardy flowers."—COUNTRY LIFE, Oct. 10th, 1925. *See page 13 of this catalogue.*
